- The information network of digital technology.
- Multimedia network video and audio .
- Cameras documentaries.
- Chapter -mail management program.

Digital Signage System

BTCO provide services in traditional advertising such as posters, billboards and print to be replaced by a technique for ads digital by units display like plasma and LCD projector has noted recent studies that ad networks digital reach announcement in a way that can not be of posters and paintings of delivery to the public, and this technique helps to display ads different through the screening a digital manner using the Internet or an internal network, where they can view the ads, guidelines and instructions directly to management and changed at any moment by the administration, and its benefits:

Its Benefits :

- The possibility of the content of the ad and the time of the declaration through control .
- The central control unit .
- In addition to the ability to display different content at the same time each .
- Screen within the same building.
- News or stocks or the weather in the screen.
- Add a number queues for the auditors administration.

Media Asset Management (Archiving)

The last decade of the twentieth century witnessed a deep and comprehensive developments in the field of information and communication technology, though recent developments across networks provided an opportunity to link parts of the world , which is obligatory for many of the institutions and departments to enter the world of technology from the wider doors to survive and deliver the message to the whole world .

The main reason for entering into the world of institutions technology is to hold the processes and tasks faster, these developments included all areas of library and information including Archive, where many developments over the Archive of clay to paper and finally to FREE .

The main reasons for the trend towards the Electronic Archiving

- Easy and speed of retrieval of documents .
- Easy and speed of use of the documents .
- Confidentiality and the protection and security of documents.
- Cost effective to provide storage places.
